DETAILED ACTION

1. Applicants' amendment filed January 8, 2002 is acknowledged and has been entered. Claims 5, 9 and 10 have been canceled. Claims 2-4 have been amended. New claims 11-18 have been added. Claims 1-4, 6-8 and 11-18 are now pending in the present application.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-3, drawn to a peptide.

Group II, claims 4, 6-8, 11, 12 and 14-16, drawn to a nucleic acid, expression cassette and method.

Group III, claim 13, drawn to a method of detecting a nucleic acid.

Group IV, claims 17 and 18, drawn to a method of treating infection in a patient by administering a peptide.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I lacks novelty under PCT Article 33(2) as being anticipated by Charlet et al, 1996 (JBC 271/36:21808-21813), which discloses a antimicrobial peptide (antibacterial and antifungal peptide) from a mussel. Group I is the main invention in this application and it lacks novelty, therefore the other claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

SEQ ID NO: 1, 3, 5-7; Applicant should elect one SEQ ID NO.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by

37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 2 and 3 for SEQ ID NO: 5-7

Claim 13 for SEQ ID NO: 1 and SEQ ID NO: 3

The following claim(s) are generic: SEQ ID NO:5.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: see above.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
